An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Morris Liss on April 30, 2004.

The application has been amended as follows:

In the claims:

In claim 12, line 14, the word "difference" has been changed to -- different --.

In claim 22, line 13, the word "difference" has been changed to -- different --.

These changes were made to correct a grammatical error.

The following is an examiner's statement of reasons for allowance: Claims 12-16 and 22-26 define over the art in that while, the art has numerous devices that induce an exciter waveform into the blood vessel, detect a resulting waveform, and using a calibration signal from a blood pressure cuff, determine blood pressure, none of the art has the frequency determining means for or the step of selecting one frequency from a plurality of frequencies for use in making a blood pressure measurement, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Both Caro et al patents, Flaherty et al, and Wohltmann et al show devices that induce an exciter waveform into the blood vessel for measuring blood pressure.

McQuilkin uses a Doppler sensor to measure blood pressure.

Seale induces vibrations and detects the resulting waveform to measure blood pressure. Seale induces signals at a plurality of frequencies, but does not select one, as claimed.

Keilman show a medical sensor that uses an RF exciter to make measurements.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert L. Nasser whose telephone number is (703) 308-3251. The examiner can normally be reached on Mon-Fri, variable hours.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Max Hindenburg can be reached on (703) 308-3130. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
